FRONTEND DEVELOPER
BLOCKCHAIN ENTHUSIAST
TECHNICAL WRITER

ABOUT

I'm Frontend Web Developer and Blockchain Enthusiast based in Lagos, Nigeria. I love minimalist & cool designs and animations. I spend most of my time either writing new codes or reviewing previous ones, adhering to real applications implementation with the knowledge and understanding of web development concepts.

I like looking for solutions and creating a great user experience. I've worked with other developers on projects and created several working SPAs and websites that are maintainable and scalable.

I like pop music and good food. When I'm not coding, I'm either reading, playing video games or writing.
